

D-Riven Engineered Solutions

Dream it / Design it / Achieve it

D-Riven Engineered Solutions is a niche engineering company that specializes in designing, engineering, and integrating equipment and products for the industrial sector.

OUR TEAM

We take on your biggest (and smallest) challenges and solve them proactively using creativity, teamwork and grit. We get to the root of the problem and ensure that our solutions add real value to your bottom line. We dedicate our efforts to finding optimal outcomes for the long term and avoid the 'quick fix' (but we can do that too).

D-Riven is unique in its team members' vast array of real world, hands-on experience that spans from the boardroom to the plant floor. We are always seeking the best talent, who have "give a damn" and want to ensure the best outcome for our customers. We conduct ourselves with the highest level of professionalism and integrity, where the safety of our customers and our team is ALWAYS the first priority, and our goal is to get our work right the first time (and every time). As a Company, we strive to perfect our approach to drive efficiency, knowing that every second counts for you and your business. Our goal is to accelerate your achievement.

We have four value-adding divisions: Industrial Fabrication (Hartwell, GA), Industrial Engineering (Customer Sites), Plant Services (Canton, MI) and Equipment Design and Refurbishment (Canton, MI).
