

## UPCYCLING by D-RIVEN

DES Industrial Upcycling is comprised of a group of highly skilled mechanical engineers, master fabricators, certified welders, and controls engineers capable of transforming old and used equipment into better than new condition, with new functionality.

This Upcycled equipment is designed to comply with OSHA standards, functionally capable of meeting the requirements of a new production process, has the latest and greatest controls and reporting capability, and incorporates the most up to date safety circuitry. Upcycling is a fraction of the cost of a new machine, and in less than half the lead time. All of this while being environmentally conscious and meeting corporate sustainability objectives.

All D-Riven Equipment is designed, engineered and fabricated in the United States.

---

### BENEFITS OF DES INDUSTRIAL UPCYCLING INCLUDE

Empowers advanced sustainability initiatives

---

Obtains maximum value from available resources

---

Saves substantial time and costs

---

Creates a safer environment and meets or exceeds OSHA requirements

---

Transforms a depreciated asset and accelerates achievement of business goals

***Accelerate Achievement***
